If selected as a Membership Director, my goal is to engage all members, especially our students, the future of our design profession, through open communication and networking. Provide resources for our new members so that they feel involved and welcome. Create more exposure for ASID Arizona North across other professional organizations and the general public by co-hosting events and CEU's, networking events and fundraisers. Be that responsive point person in the chapter that members and non-members can use as a resource to have questions answered and communication relayed.
